EXPLANATION

OF THE

T A B L E S.

INSURANCE on Ships and Merchandize, is an Expedient devised for securing to the Proprietors their Interest in case of a Loss; but Persons Insuring the Cost only, without including the Præmium, &c. paid for Insuring, will be Sufferers; and that in a greater proportion as Præmiums increase.

To such therefore who wish to be fully covered when they Insure, this Book will be particularly useful; the Tables therein being constructed with Accuracy will facilitate the dispatch of Business, as they obviate the Errors and Loss of time in making troublesome calculations on every occasion and alteration of Præmiums:

They commence with the Præmium of Ten Shillings *per Cent.* they are regularly continued to Thirty Guineas, and thence by an advance of

a

Five

Five, up to Sixty Guineas *per Cent.* beyond which it seems unnecessary to extend them, as at such high Rates the amount of the Premium requisite to cover any Interest, would be so great, that the Insured would be considerable Losers by a Ship's safe arrival.

In each Page, under the respective Præmium, stands, in the first Column, the Nett Interest or Value to be covered: The second Column contains the Sum requisite to be Insured to cover the same, on the principle that a Commission of $2\frac{1}{2}$ *per Cent.* be allowed to the Merchant for settling a Loss: In the third Column is the Sum to be Insured, if the said Commission be only 2 *per Cent.* And in the last Column is the Sum required when the Interest is one's Own, and no Commission charged. Wherefore, the customary charge of Commission for making the Insurance, and in case of a Loss, the consequent Brokerage and Commission for settling the same with the Underwriters, being allowed for, the Utility of the Tables will be demonstrated by the following

EXAMPLE.

EXAMPLE.

Suppose my Correspondent at *Jamaica* advises me that he has Shipped on his Account, in the *St. George*, Capt. *Warren*, sundry effects which amount to £1250 Sterling, and orders me to Insure the same;—His order comes to hand when the Premium happens to be Ten Guineas *per Cent.*

In this Case, I shall charge him with the Premium at 10 Guineas *per Cent.* on £1250 Insurance and a Policy Eleven Shillings £ 131 16
My Commission $\frac{1}{2}$ *per Cent.* on } 6 5
ditto for making it }

£ 138 1

If the Ship should be Lost,

The Broker will charge $\frac{1}{2}$ *per Cent.* on £1250, for settling with the underwriters }

6 5

And my Commission will be at $2\frac{1}{2}$ *per Cent.* on £1243 15 received from the Broker }

The Total Charges will then be £ 175 7 10
Which deducted from the Sum Insured — — }

1250

Leaves Nett to my Correspondent no more than —

} £ 1074 12 2

But

But, if I had been ordered to cover the said £1250, I should in order to find the Sum required to be Insured, recur to the Table of 10 Gs. *per Cent.* in P. 58, where will be found in the second Column under $2\frac{1}{2}$ *per Cent.* against £1000 — £1162 12 6

The Author hereof, before he concludes, would only observe that he could never learn that any thing of this kind has been before attempted except a small Set of Tables Printed in 1764, under the name of *Thomas Chalmar Esq*; which from their principles were not then, nor can now be of any use.—He therefore hopes it will not be deemed an Impropriety to say this is *an entire New Work*; and, as by the present situation of Commercial Affairs, it may more especially become a necessary Assistant in the Compting House, he flatters himself it will prove a very seasonable Publication.
